My Farewell as your President May 2017- May 2019 Winifred H. Holland

The Rome Federated Garden Club Presidency gave me a new look about the working and planning to make our world a better place. It opened my eyes to the wishes and hopes of people. We as a Federation shared our creative dreams and plans with our county and city leaders to help fulfill dreams for Our Plot on this Earth,Rome City and Floyd County.

It opened my eyes to people's dreams and aspirations for our 10 clubs that make up the Rome Federation . All of our club members have been busy with deciding critical issues. The keeping of our Federated House at 100 8th Street Rome, GA and the research that was completed to help members to see what was best for all concerns on this critical issue kept these two years of service a busy one. Thanks to our Vice President, Carrie Wilder, for her research on the condition of the house. Stanley Boulee, our Treasurer, carried us through with information of just where we were in the finanical records. Therefore, intelligent and smart decision could be made by all on what was best for all concerns.

It showered me with the love from all the Executive Board Members and their hard work throughout these two years. The planning and execution was by Jo Hernandez of the Environmental Schools which were held at the EOC Center Rome, GA. She did a formidable job pulling it all together and making it a stupendous success. Joy Puckett organized the social part in this school by having breakfast and lunch available for the participants in each school. Our corresponding secretary, Judy Howerton, did all the publishing of these events and getting it to the eyes of participates. Outstanding work by these incredible people in getting the school ready, made it a true success. It showered me with responsibilities that I did not always understand, yet Jane Davis and Barbara Ivey were there to always help me make the best decision for whatever appeared at the moment. Thank you, Jane and Barbara. Caroline Alford, our Parliamentarian, never faltered. She spoke the right answer when details and corrections for the parliamentary process arose. She never let me stall with the Parliamentary Process.

Last I want to thank Brenda Harp and her committee, Joyce Gaston and Susan Little, for the updating the Rome Federation Bylaws. They spent many hours in bringing the rules of order up to date and workable for the next few years. The work that these people rendered "put icing on the cake."

"Thank You" to These Wonderful, Beautiful, and Caring Coworkers and Friends. You are my life time friends. You have made a differences in the Rome Federated Garden Clubs and the life in Rome and Floyd County.

Winifred H. Holland

May 07, 2019

My Experience With RFGC

It gave me experience of working out problems Planning for new ideas Of just how the community Of Rome could be a better place For all citizens.

> It opened my eyes To people's wishes, hopes and Aspirations.

It showered me

With the love

From those I

Worked, laughed and cried with.

It helped

Me to know that

It was my responsibility

To seek cooperation, and consideration from all.

It taught me Patience with Conflicts and Resolutions.

It sobered

My thoughts

That we all have our differences

And that it takes time to work through Mazes of ideas.

It introduced Me to a caring group of ladies That all want to care for God's Green Earth.

Love to all

with this

Great experience

With Rome Federated Garden Clubs.

Winnie Holland 2019

ENVIRONMENTAL SCHOOL COURSE IV

The Course IV of the Environmental School will be held at the ECO Center May 15-16. This will conclude the Environmental School which has been a great success. We already have 26 people signed up for the class and expect possibly a few more. Not to late for you to join us since the classes can be taken in any order.

To register go to the RFGC website and copy the trifold under "News" tab which has a registration form or contact Stanley Boulee at stanleyboulee@gmail.com.

MORE SCHOOL NEWS

NGC LANDSCAPING DESIGN SCHOOL TO BE OFFERED

Laurel District and The Rome Federated Garden Clubs will be offering the NGC Landscaping Design School in Rome. The class dates are: August 7 & 8; November 20 & 21; February 12 & 13, 2020; and April 28 & 29, 2020.

You will be receiving more information about this school in the near future. Jo Hernandez, Chairperson of the Ways and Means Committee, is presently working out the details with the GCG personnel. Be sure to "Save the Date."

PLANT AMERICA

The National Garden Club is keeping **"Plant America"** as the theme. **Gay Austin** from Mississippi is the incoming **NGC President**. The Project is "Plant America Community Project Grants" that will be offered and awarded to new and continuing projects of our local garden clubs in each year. See the NGC website for more information and find out if your club has a project that qualifies.

Barbara Borque is the new **Garden Club of Georgia President**. The GCG theme for 2019-2021 will be "**PLANT AMERICA—Nurture The Garden We Call Georgia.**" One special project will include "**Plant Natives in Public Gardens.**"

Marie Purser is the new Laurel District Director. Her theme is "Cultivate the Beauty of North Georgia."

Carrie Wilder (Seven Hills) is the new **Rome Federated Garden Clubs President**. Her theme is "3...2...1...Let's GROW!"

CLOCK TOWER GARDEN

By Jennifer Kearns

We did it!!!

Our **Clock Tower Garden** has been completed and given to the **City of Rome**. Our Laurel District Director, John Barnett and the Rome Federated Garden Clubs President, Winnie Holland, made the Dedication official with the unveiling of the Pollinator sign. I will share with you a summary of the program below:

The program started with a welcome by Jennifer Kearns, President of Seven Hills Garden Club, thanking the City of Rome for irrigation and all 10 of the Rome Federated Garden Clubs for the work and support for this two year project led by Seven Hills Garden Club.

Nelli Luthi described the idea of how a Pollinator Garden was decided and the process of the project which involved many months of weed and acorn removal. Since we are a Bee City, it

only made sense to create a Pollinator Garden at Bailey Park by adding needed native and perennial plants. Nelly gave the important stages of the pollinators from egg, caterpillar, cocoon to butterfly and listed other beneficial insects. She concluded by telling us that one of every three bites of food depends on the work of a pollinator.

Sheelah Schreiber told us about the history of the Rosalynn Carter Butterfly Trail which came about in 2003 when populations of Monarch butterflies were small in number or not seen around Plains, Georgia. The Clock Tower Garden application submitted by Sheelah for the Federation included 16 types of butterflies to attract, at least 20 plants for nectar sources and 13 host plants. A sign at the entry of the garden shows our butterfly trail designation.

Sheelah presented he Butterfly Trail book from the Rosalynn Carter Butterfly Trail to Ruth Forrester, Board of Trustees Member of the Sara Hightower Library for the Children's Department, and a book for the Rome Federated Garden Clubs to Winnie Holland.

Winnie Holland, President of the Rome Federation of Garden Clubs, composed and read a poem about gardens and how we can help create life for pollinators.

Our invocation was given by Rev. Jim Bradshaw who shared a litany of appreciation for the Donors, Artist, and Gardeners who made this space possible. A blessing was said for the water, soil and seeds and included responses from the attendees.

At last the unveiling of the beautiful Pollinator sign, made possible by the City of Rome and Marcy Erwin, took place. The sign is located near the steps leading to the hill and in driving by the garden since, I have seen admirers reading the sign. This summer we hope you will come by and watch as the beautiful flowers, bushes and trees provide life for God's creations.

The Creation of the Pollinator Garden at the Town Clock

I rest my thoughts as I Stroll through this magnanimous creation of soil and plant life Growing upon this hill plants with leaves, blooms and stalks. All from Loving and caring hands Toiled, Trudged through Studied Cared for this plot of soil Just how to arrange and create this Garden of beauty For creatures to fly, For creatures to crawl, For creatures to feed and pollinate For Creatures to rest, For creatures to give life, Bringing lasting changes. Lord, we see the morning's sun filtering through Your leaves, your blossoms, your stems Giving off the beauty of your creations While waiting on creatures seeking food and shelter. We see the diamonds and pearls Beaming from each of the leaves, blossoms, stems spreads the early morning dews quietly splashing It moisture Across the garden of living beauty. Tiny sparrow flying above Waiting for the quiet peace To make a safe landing To feast upon the tiny creatures while make their landings

To build their homes with leaves and stem that spread Forth to catch the light forever growing. Seeds and Plants grow and flourish. serving as a welcoming spot To the Monarch Butterfly Dashing in and out Bees of many sorts gather their nectar. Birds stalk their prey Caterpillar waiting to display beauty. May this be an appreciation To visitors who come through this town Citizens who call Rome their home Perhaps they might see this mighty creation filled with Differences in colors, Different shapes, **Different sizes** Giving beauty and glory to all creation Just as we are, In this vast growing and sometimes cruel And unjust world. Yet we know that understanding The beauty of our world Can help us to understand that all living creatures have A place. of love and beauty that is Appreciated as we celebrate on this April 10th, 2019 morning. Through our thoughts, our words, and our deeds, May this be a thanks to all who prepared for This special occasion as we close With the Great Amen! Amen.

> We love this Our Great Earth of Creation. By: Winifred Holland April 10, 2019

Federated Facts MAY, 2019 Volume XXXVIII, Issue 3 PLANT AMERICA -PLANT NATIVES IN PUBLIC GARDENS, A GCG SPECIAL PROJECT

Butterfly Milkweed

North American native butterfly weed (Asclepias tuberosa) is an easy-care, well behaved plant with its fiery shades of red, orange, and yellow. It needs little attention and provides wonderful high summer color. Ideal for meadows and borders.

<u>Five reasons to add butterfly weed to your garden:</u>

- _Bright orange flowers are a **nectar source** for many butterflies.
- + Strappy leaves are a **food source f**or monarch butterfly caterpillars.
- + Rarely subject to serious insect or disease problems.
- + Deer usually avoid butterfly weed.
- + Grows in full sun and is one of the best **water-wise** plants.

Ring the dinner bell, put out the welcome mat, for bees and butterflies by planting butterfly weed alongside other pollinator-magnets such as butterfly bush, bee balm, and coneflower.

Who doesn't love to see dainty, colorful butterflies in their garden? But of course, they're more than cute and fun to watch, they are important pollinators! Here's a quick review on ways to make your garden Butterfly-friendly.

First thing, don't use pesticides, for obvious reasons! Secondly, embrace the caterpillar...not literally, but remember it's the caterpillar that becomes the Butterfly. So we need to provide plants that supply food and shelter for the larvae, and we can't get too upset when they chomp through a few leaves. Just put a few of the host plants in with other perennials to hide the nibbled foliage.

Your new winged friends enjoy "puddling," or hanging out in mud or sand puddles where they can drink the water and ingest some much needed minerals. Create some puddles in your garden soil, or fill a shallow pan with sand and a little water and let the puddling begin! After a nice long drink, they'll appreciate some flat rocks in your garden on which they can rest and sunbathe. If you plant it, they will come.

THE END

It showered me with responsibilities that I did not always understand, yet Jane Davis and Barbara Ivey were there to always help me make the best decision for whatever appeared at the moment. Thank you, Jane and Barbara. Caroline Alford, our Parliamentarian, never faltered. She spoke the right answer when details and corrections for the parliamentary process arose. She never let me stall with the Parliamentary Process.

Last I want to thank Brenda Harp and her committee, Joyce Gaston and Susan Little, for the updating the Rome Federation Bylaws. They spent many hours in bringing the rules of order up to date and workable for the next few years. The work that these people rendered "put icing on the cake."

"Thank You" to These Wonderful, Beautiful, and Caring Coworkers and Friends. You are my life time friends. You have made a differences in the Rome Federated Garden Clubs and the life in Rome and Floyd County.
